

Electronic Ticket Agent

Tourism - Our single focus.

Based in Ottawa, Canada, eKiosk Inc. (eKi) has developed a complete and cost effective e-ticketing solution designed specifically for the Tourism industry. We have over 30 years experience in the tourism industry, as successful owners, developers, operators and managers. eKi patented software and hardware solutions meet the needs of both hotel operators, visitors and tourism ticket vendors alike by offering advanced features and functionality not found in the market today.

E TICKETS – OUR PRODUCT

eKi provides convenient, easy to use, totally automated e ticketing hardware and software devices to promote and sell Ticket vendor products and services. eKi e-ticketing devices are available as a free standing Electronic Ticket Agent (ETA) and an E Concierge ‘ table top’ device.

The ETA is to Tourism what the ATM is to Banking!

MAJOR SITE LOCATIONS

Visitors will be able to access the eKi Electronic Ticket Agent program from specifically deployed kiosks located at various high traffic locations including hotels and visitor information centres. The ETA's allow guests to easily review event and venue information, determine ticket availability and pricing, and ultimately use their credit card to purchase tickets. These free-standing and desktop terminals are available 24 hours a day and feature digital video displays which allow for numerous advertising possibilities.

VENDOR & SITE LOCATION BENEFITS

The Electronic Ticket Agents provide tour & attraction operators with the ability to put their product directly in front of their consumers at the point-of-decision. Unlike printed brochures, the ETA's also allow visitors to view dynamic video content and purchase their tickets on the spot. Since all of the units are Internet enabled, content and pricing is always up to date. EKI installs, maintains, and insures all hardware and software at no cost to the venue or to the ticket vendor. EKI charges the ticket vendors a surcharge per each successful transaction using the EKI installed e ticketing system.

CONSUMER BENEFITS

For the consumer, the ETA units provide easy access to information and tickets for the major tours & attractions in each city. No additional surcharges incurred by the customer. The price for each ticket is the same or lower than a visitor would pay at the actual tour or attraction location.
